

Dear colleagues,

AVTODOREXPO, International Road Industry Forum, is a highly professional platform for sharing experiences and establishing new contacts, where the most advanced road construction and repair machinery, road marking and maintenance machinery, traffic control devices, road traffic safety and control means are showcased.

AVTODOREXPO is focused on new ideas and technologies. In these days, when the industry is being actively reformed, AVTODOREXPO brings together the best professionals who implement fundamental reforms, promote modern road design and construction standards.

I hope that all participants of the 16th edition of AVTODOREXPO will have an excellent chance to engage in meaningful dialog with foreign and Ukrainian partners, demonstrate the latest scientific developments and lay the groundwork for further cooperation. Ukraine's road industry is being changed, and it's we who are changing it for the better together.

I sincerely wish you success.

Head of the State Agency of Motor Roads  
of Ukraine

Slawomir Nowak
